REPORT

ON THE

CENSUS OF COCHIN, 1921.

INTRODUCTION.

The Census of 1921 was the sixth systematic enumeration of the population of the State and the fifth taken simultaneously with that of British India. By command of His Highness the Maharaja the Census was taken on the morning of 19th March 1921, except in the case of travellers and the houseless poor who were enumerated on the night of the 18th. The hill tribes were enumerated between 11th and 17th March. The enumeration on the 19th March purported to record the facts as they stood on the night of the 18th. The month and date were proposed by the Government of India and accepted by His Highness' Government. A full account of the procedure adopted in connection with the taking of Census is given in the administrative volume as instructed by the Census Commissioner, but a general outline of the procedure adopted for taking Census is given in the following paragraphs.

2. For Census purposes, the State was divided into ten charges, each of the six Taluks and the four Municipal Towns being treated as a charge. The Tahsildars of the Taluks and the Presidents of the Town Councils were appointed Superintendents of the several charges. The charges were sub-divided into 532 circles which were again sub-divided into 5,367 blocks. Each of the circles was placed under a Supervisor, and an enumerator was appointed to take the Census of each block. The majority of Supervisors and enumerators were Government servants and teachers of aided schools, the rest being private gentlemen. The work was carried out by unpaid agency, but non-official Supervisors and enumerators were paid travelling allowances at the rate of 2 annas a mile provided the distance travelled, to and fro, was not less than four miles. This amounted to Rs. 2,853—12—0. The average number of occupied houses in a block was 33 and the average number of blocks in a circle was 10. No change of procedure in the taking of Census was newly introduced.

3. The work was started with the numbering of houses and the preparation of house lists. After all the houses were numbered a statement showing the number of houses in each village and the number of each grade of Census Officers required in each charge was prepared by the Charge Superintendents and sent to me for approval. The house numbering in Municipal Towns was carried out by the Town Council subordinates, and in rural villages by the village staff between 13th February and 13th May 1920. Before the preparation of the preliminary record, viz., the filling up of the Enumeration Schedules with particulars regarding all persons

ordinarily resident in each house, a set of circulars and rules were issued by the Diwan for the guidance of the Census Officers and classes were held by me in 16 centres for giving instructions to Supervisors and enumerators. In this way it was possible to give the Supervisors and enumerators a thorough idea of their duties before actual Census work began. The preliminary enumeration was commenced on 1st February in rural parts and on the 10th February in Municipal Towns and the whole of this work was completed before 25th February. The original entries were made on plain paper and after check and correction by Supervisors, the entries were copied into printed schedules.

4. For the final Census all public offices and schools in the State were closed for three days from 18th to 20th March to enable all Government servants to carry out Census work. The final enumeration or the actual Census was taken on the morning of 19th March between daybreak and noon. The enumerators went round their blocks and brought the record up-to-date by striking out the absentees and entering particulars of new arrivals. Special arrangements were made for the enumeration of travellers by road and canal, the sea-going population and the houseless poor. The travellers by rail were enumerated by the railway authorities who after totalling the schedule despatched the enumeration books direct to my office. Along with the preliminary enumeration an Economic Survey showing earnings and expenditure, profession, etc., (both family and individual) of the residents in each house was also conducted by the ordinary enumerators. An Industrial Census was also conducted in special schedules which were filled up with the assistance of special enumerators by the owners, Managers or Agents of factories, mills, etc., in which not less than ten persons were employed on a normal working day between 10th February and 10th March.

5. On the afternoon of 19th March or immediately after the final Census the enumerators met their Supervisors at a place previously agreed upon and prepared the block abstract showing the number of houses and persons, male and female; this was checked by another enumerator and having checked them himself the Supervisor prepared the circle abstract and despatched it with the schedules relating to his circle by the quickest route to the Charge Superintendent who checked all the circle abstracts and prepared the charge summary and despatched them to my office, where after checking the block, circle and charge abstracts the provisional totals for the whole State were compiled. The Trichur Town summary reached the central office first and the last was that of Mukundapuram Taluk which was received on 22nd March. The provisional totals were ready on the 23rd and were telegraphed to the Census Commissioner for India at Simla and the Provincial Superintendent at Madras on the same day. According to the provisional figures the total population was 979,019 or 61 less than the figures eventually arrived at after Tabulation. The difference between the two totals was thus only 6 persons in 100,000 as against 57 persons in 1911.

6. There were three special gatherings on the night of the Census day; one was on account of Uthsavam in the Thirumala Devaswam Temple at Ernakulam, and the second at Chewara in Cochin-Kanayannur Taluk on account of Pooram in the Edanad Temple and the third at Trikur in Mukundapuram Taluk where there was a festival in Chakkamkulangara Temple. Special arrangements were made for censusing persons collected there and no difficulty was experienced in enumerating them.

7. The attitude of the people was throughout friendly and helpful and no difficulty of any sort was experienced in any part of the State. Though 19th March was Saturday, the Sabbath day

for Jews, the Jews did not make any objection to answer questions put to them by the enumerators. The public have begun to realise that the taking of Census is not an idle curiosity and the punitive provisions of the Census Regulation XI of 1095 had not to be enforced in any part of the State.

8. The abstraction and tabulation section of the Central Office was opened on 20th March and work commenced immediately. Abstraction and tabulation. This office began work with six Supervisors, six Assistant Supervisors and 60 copyists. An Inspector was afterwards appointed to supervise the whole work. He was also sent to Madras and got trained in the Madras Central Office in abstraction and tabulation work. The slip system of working out the results of the enumeration, introduced at the Census of 1901 was continued this time also and 54 copyists were engaged in copying slips. Copying and checking the slips were completed in seven weeks and the services of 12 copyists were then dispensed with. There was a delay of 15 days in the receipt of sorters' tickets and rules for sorting for the various tables from Madras and this was taken advantage of for compiling certain figures connected with the Economic Survey. The services of some more copyists were then dispensed with and sorting began on 14th June with 40 copyists, and the work was completed in less than three months. The compilation and fair copying of figures from the sorters' tickets took seven weeks more after which the whole of the staff was disbanded. Thus in all the Abstraction and Tabulation work took exactly seven months.

9. The total cost of the Census from 19th January 1920 the date of my taking charge as Census Superintendent to 18th January 1922 amounted to Rs. 21,584—2—0 and approximately an expenditure of Rs. 2,015—14—0 will have to be incurred before the whole work is wound up. Cost of Census. The total expenditure will thus amount to Rs. 23,600 or Rs. 24—1—0 per thousand of the population, as against Rs. 23,822 or Rs. 25—15—0 per thousand of the population in 1911. Of the total expenditure the sum of Rs. 10,400 represents the cost of taking the Census including Rs. 2,853—12—0 paid as travelling allowance to non-official Supervisors and enumerators while the balance of Rs. 13,200 was expended on the work of abstraction and tabulation, report writing, &c. The expenditure includes a sum of Rs. 1,311—10—6 the cost of printed forms, &c., received from the Government Press, Madras. The decrease in expenditure, as compared with that of the previous Census, is due to the higher pay drawn by the Superintendent of 1911. During the first three months after my appointment, I was engaged in assisting the Diwan Peishkar and Controller of Civil Supplies in the checking of Rice Depot Accounts and organising Rice Depots in the Ernakulam and Mattanchery Towns.

10. I have to record my grateful thanks to the Tahsildars and Presidents of Town Councils for their co-operation and assistance throughout the various stages of the Census operations. Acknowledgments. The large body of Supervisors and Enumerators, both official and non-official, on whom the brunt of the work had fallen, cheerfully and satisfactorily carried out their duties, and brought the operations to a successful termination. The work of abstraction and tabulation was carried out under the supervision and tactful management of Inspector Mr. T. G. Subramania Iyer who was loyally and zealously supported by all my office staff. My grateful thanks are also due to M. R. Ry. Rao Sahib T. V. Kasturi Renga Iyer Avl., Diwan Peishkar, for the ungrudging support I have always received at his hands in the discharge of my onerous and responsible duties.

11. Agreeably to the instructions issued to me by the Census Commissioner, I have endeavoured, as far as possible, to confine myself in the succeeding chapters to discussions of matters germane to changes and development within the decade, and I have also appended a few notes here and there on subjects of special interest. Detailed information on the several subjects dealt with herein can be got from the various published records such as previous Census Reports, Administration Reports, State Manual and Cochin Tribes and Castes, and I have therefore not thought it necessary to tread the beaten track.

CHAPTER I.

—:0:—

DISTRIBUTION AND MOVEMENT OF THE POPULATION.

12. Cochin, together with Travancore and the Madras Presidency West Coast Districts of South Canara, Malabar and Anjingo (excluding Lacadives) comes under "Malabar and Konkan" in the natural divisions in which different parts of India are grouped for census purpose. The State lies between 9° 48' and 10° 50' North Latitude and 76° 5' and 76° 58' East Longitude. It consists of two parts, the larger lying along the coast and the smaller comprising the chief portion of the Chittur Taluk and encircled by British territory. The eastern half of the larger part is covered by forests and mountains and is almost uninhabited. The rest of the State is thickly populated, those lying along the coast being more populated than those in the interior. The State is divided into six Taluks, viz., Cochin-Kanayannur, Cranganur, Mukundapuram, Trichur, Talappilli and Chittur. During the decade, portions of Chittur and Tattamangalam villages, in the Chittur Taluk were constituted into a Municipal Town called "Chittur-Tattamangalam Town" which has an area of 3·7 square miles and a population of 18,150 persons.

13. The general statistics of the area and population of each Taluk will be found in Imperial Table I. The total area of the State according to the cadastral survey including forest and inland backwaters is 1,479 square miles, and the population according to the census is 979,080. Assuming even distribution of the population over the entire area, there will be 662 persons for every square mile. The most populous Taluk is Cochin-Kanayannur which has a population of 279,384 though its extent is only 158 square miles; in point of extent Mukundapuram is the largest having an extent of 510 square miles; but its population is only 208,713. Cochin-Kanayannur has therefore 1,768 inhabitants for every square mile while Mukundapuram has only 409. The smallest and the least populous Taluk is Cranganur whose area and population are 17 square miles and 34,808 persons respectively.

14. Subsidiary Table I at the end of the Chapter shows the mean density of the population per square mile, together with statistics relating to cultivation. Density per square mile is 662. * Travancore, Malabar, South Canara, Baroda, Madras Presidency, Kashmir State, Ceylon, Coorg, Central India and Mysore have only a density of 525, 535, 310, 262, 297, 39, 176, 104, 116 and 203 respectively. In point of density Cochin stands highest not only when compared with the districts in the Madras Presidency, but also with many other States and Provinces in India.

15. The variation in population is noticeable in Chittur, Tattamangalam, Methala and Lokamaleswaram villages. These are due to portions of these villages being converted into Towns. Portions of the first two villages were constituted into Chittur-Tattamangalam Town and portions of the last two into Cranganur Town. The area and population of these

* NOTE.—The area given in the report for 1911 is according to the Great Trigonometrical Survey. If calculated upon that area, the density will be 719 per square mile.

four villages have therefore undergone some reduction. Changes due to actual movement of population are very little and can be ignored.

16. The latter part of the decade cannot be said to have been a prosperous one, and consequently it was not very favourable for the natural growth of population. There were, during this period, several severe outbreaks of epidemics of influenza, cholera and small-pox and these have contributed not a little in the loss of potential parents. The out-break of influenza in 1918—19 was as virulent as elsewhere in India. Even famine and plague, though the latter in a small scale, visited the country. The failure of both monsoons, and the early out-burst of the South-West Monsoon in 1918, destroyed the paddy cultivation in 1918 and 1919. The depression in trade and industry, consequent on the great European War, also left its indelible mark upon the prosperity of the country. The high cost of living during these years was beyond the purchasing power of the people and checked the growth of population. Nevertheless the influence of custom, social and religious, and other rooted habits of the people gained the upper hand, and resulted in increasing the population by 6·6 per cent. during the decade as against 13·06 per cent. in 1911. According to the census of 1911, there were 117,171 persons in the age periods of 5-10. This number should therefore represent the population in the age periods of 15-20 at the census of 1921; whereas the enumeration results show that the population in the latter age period is only 93,733 thereby showing a decrease of 23,438. Such large decreases in population are found in all quinquennial age periods up to 65-70, the total decrease under the various age periods being 168,728. (Vide Table VII and corresponding Table for 1911). The whole of this large decrease cannot certainly be due to emigration, which is only a negligible quantity, or even mis-statement of age. Leaving however a wide margin for these two, deaths during the decade cannot be less than 150,000; while therefore the population as a whole has increased by 6·6 per cent, the death rate during the decade in the age period 15-70 alone is not less than 15 per cent. The State is however regaining rapidly its normal conditions. 1919 and 1920 were prosperous years. The monsoon rains were plentiful and trade and industry are showing signs of revival and the prosperity of the people is appreciably increasing. The industrial survey shows that there are now in the State 109 industrial concerns employing 10 persons or more. With the revival of trade and industry, the demand for higher wages is however increasing and the labouring class has begun to realise their relative importance and strength of combination. The prices of imported articles do not show a downward tendency; but notwithstanding all these facts, the State is enjoying an era of comparative prosperity, and the result of the next census is expected to show a higher percentage in the growth of population.

17. The registration of vital statistics is still in its infancy and the statistics collected from that source is useless from an actuarial point of view. The Village Officers in rural areas continue to register births and deaths and special Registrars have been appointed for the purpose in Municipal Towns. The rules framed from time to time for improving the registration of vital statistics have gone a great way towards improving the system; but much remains still to be done. The masses are slowly getting accustomed to reporting births and deaths, but it cannot be expected to attain an approximate amount of accuracy in the near future. The growth of population is determined (1) by the difference between the number born and the number who die and (2) by the balance of migration i. e., the difference between the immigrants and the emigrants. Judged from this

The condition of the decade 1911—1921.

Statistics of births and deaths.

standpoint, the population of the State cannot reach the population enumerated during the census.

18. Migration is the next factor which affects the movement of population. It varies according to the conditions under which the change of residence takes place. This may be temporary or casual, periodic or permanent. Visits to relatives or friends and to the sick and infirm, and travelling on business or duty or on account of epidemics in the locality, come under the category of temporary or casual migration. Periodic migration consists of the movement of labourers during harvest season, &c. Imperial Table **XI** and Subsidiary Table **IV** containing statistics of emigrants and immigrants furnish material for ascertaining the growth and decline of the natural population. Migration from Taluk to Taluk in the State has not been recorded. Those who are born outside and censused within the State are shown in the Table **XI**. Permanent migration takes place either owing to the attraction of places other than that of one's birth, or in connection with trade or profession. It will be seen from the Tables that 39,759 persons or 4.1 per cent. of the total population were born outside the State against 47,266 persons or 5.1 per cent. in 1911. The number of persons born in the State and enumerated outside the State as gathered from the statement received from the Provincial Superintendents was 23,512, as against 25,047 at the previous census. The result of migration has thus been a gain to Cochin of 16,247 against 22,219 in 1911. Cochinites are a homestaying people and permanent migration even from one part of the State to another is viewed with considerable misgivings. Increasing pressure upon the means of subsistence is acting as a stimulant to the less-favoured section of the population to migrate to distant places.

19. A house was defined to be "the dwelling place of one or more families with their resident servants, having a separate principal entrance from the common way". Houses are generally built of mud or stone or both and the designs of these depend upon local tastes and facilities and resources of the occupant. Every house in Malabar, except those built on street systems, has a fairly big compound wherein fruit trees &c., are reared. Great improvements have been made in the style of houses, so much so that the old style of typical Malayalee houses can rarely be seen except in country parts. The total number of occupied houses is 178,211 and the average number of houses per square mile comes to 120. Talukwar statistics of persons living in each house and the average number of houses per square mile are given in Subsidiary Table **VII**. The occupied houses according to the present census exceeded those in 1911 by 14,925 thereby showing an increase of 9.1 per cent. as against 12 per cent. during the Census of 1911. The average number of persons for each occupied house comes to 5.5 as against 5.6 during the last census. In Travancore and Malabar occupied houses increased by 15 per cent. and 6.8 per cent. respectively, the average number of persons per house being 5.2 and 5 respectively. The average number of houses in towns is 2,391 and the average number of houses in villages is 574. Artificial methods of keeping down population, e. g., abortion and infanticide, wilful neglect of infant life and voluntary restraint in married life are unknown in the State; on the other hand a large family with a number of children is considered to be a happy one though its pecuniary condition is far from being satisfactory. Every true Hindu is expected to beget a son not only to perpetuate the species but also to save his soul from "Naraka" or "Hell". Marriage is thus a sacrament and not a social function contracted for the sake of enjoyment. The Marumakkathayam system of inheritance kept the joint family system among

Malayalees in its full vigour till a few months ago, when a law was passed regulating partition etc., in Nair tarawads. Young men imbued with western ideas of individual rights and privileges are springing up everywhere and in every community and the partition of joint families has become the order of the day. Considerable increase in the number of occupied houses during the next census is a foregone conclusion.

20. The number of unoccupied houses in the State is 30,707 as against 13,175 in 1911 thereby showing an increase of 17,532. The great number of public buildings, shops, etc., which have subsequently sprung up must have greatly added to the number of unoccupied buildings. Of the unoccupied buildings 2,734 are places of worship, the rest being public buildings, shops, etc.

21. This paragraph deals with the pressure of population on the means of subsistence. The population in the State on the whole has increased by 6·6 per cent. notwithstanding adverse circumstances which operated as a check upon the normal growth of population. With favourable monsoon and land breeze the State can now produce only sufficient paddy to maintain her population for seven months in a year, and the deficit is made good by importing large quantities of rice from Burma and other places. Large tracts of lands in the Cochin-Kanayannur and Cranganur Taluks are cultivated with cocoanut palms, and paddy flats are being still reclaimed and converted into cocoanut gardens. Cultivation of cocoanut trees is no doubt a very useful and paying industry involving less labour and capital than paddy cultivation; but demand for paddy with an ever increasing population in these two Taluks will always be on the increase. According to the statistics collected during the economic survey the extent under paddy cultivation is only 266,946 acres. This works out an average of 27 cents per head of the population. The question of bringing more lands under cultivation is now engaging the earnest attention of the Durbar. The standard of living is another factor to be considered in this connection. The poor have begun to emulate the rich in their high standard of living and adoption of European method of living among the well-to-do is not rare; but unfortunately, the resources available to the people for making wealth are limited. The industries in the State are still in their initial stage and the purchasing power of the people cannot cope with the current market price of many of the necessities of life. Skilled labourers are few, and the demand for higher wages even on the part of unskilled men is increasing. As comparatively better wages are paid in factories and other industrial concerns, agricultural labourers are being attracted thereto and the cost of cultivation has thereby considerably increased. In fact, the wage conditions of the villages are being gradually assimilated to those of the Towns. Poverty among labourers cannot be met by increasing wages. As wages increase, cost of production will also increase which means an increase in the price of the produce. Thus wages and prices will be moving in a circle, and efforts have therefore to be made for increasing production by increasing the fertility of the soil, and by introducing other measures which are calculated to increase the wealth of the country.

22. The first systematic census in the State was taken in 1875. The growth of population since then is noted below:—

Year of census	Interval between each census	Population	Percentage of Increase + decrease —
1875	17	601,114	+ 50.0
1881	6	600,278	— 0.1
1891	10	722,906	+ 20.4
1901	10	812,025	+ 13.3
1911	10	918,110	+ 13.6
1921	10	979,080	+ 6.6

The above table will show that the growth of population during the decade has received a check when compared with the growth during the last three censuses. While commenting upon the condition of the decade, I have observed that the conditions prevailing at the latter part of the decade were not favourable for the natural growth of the population. Cholera, small-pox and influenza which prevailed in almost all villages in the State during 1918 were responsible for the loss of many people. The scarcity which prevailed and which to a certain extent prevails even now, and the consequent high prices of foodstuffs have also contributed their quota in arresting the normal growth of population.

SUBSIDIARY TABLE 1.

Density, water supply and crops.

District and Natural Division "Malabar and Konkan"	Mean density per square mile in 1921	PERCENTAGE OF TOTAL AREA		Percentage of cultivated area which is irrigated	Normal rainfall	PERCENTAGE OF CULTIVATED AREA UNDER			
		Cultivable	Cultivated			Rice	Wheat	Pulses	Other Crops
1	2	3	4	5	6	7	8	9	10
Cochin State ..	662	0·1	56·0	36·4	109·4	47·4	...	10·6	42·0

CHAPTER II.

POPULATION OF CITIES, TOWNS AND VILLAGES.

23. Imperial Table III and Subsidiary Tables I, II and III of this Chapter exhibit the population of towns and villages. There are no cities in the State containing a population of 100,000.

24. The physical and economic factors influencing the distribution of population have been discussed in previous Census reports. It is not therefore necessary to go over the same ground again. There are no special matters of importance to be taken up now. Suffice it to mention here that, as in the previous decades, the taluks bordering the sea and the backwater continue to be much more densely peopled than those in the interior.

25. No change was made in the definition of "Town". It comprised all Municipalities of whatever population and every other continuous collection of houses permanently inhabited by not less than 5,000 persons. The importance of the place as a centre of trade and its historic associations were other factors to decide a place to be treated as a town. There were accordingly 9 towns in the State in 1911. Parts of the Methala and Lokamaleswaram villages in the Cranganur Taluk were newly constituted into Cranganur town and Chittur and Tattamangalam towns were clubbed together into Chittur-Tattamangalam town during the decade, and the number of towns therefore remain the same in 1921. The rest of the State, excluding the Reserve Forests, is divided into 273 villages which are more or less uniform in size. The population of these villages, however, varies considerably according to their situation. The villages in the backwater area are very densely populated, while those in the interior and all the confines of the forests are sparsely inhabited. These villages are only administrative units and are not to be understood as meaning closely built rows of houses as in the East coast. The houses are more or less detached having extensive compounds, between which there are long winding foot-paths or lanes; but in places where Christians and non-indigenous Hindus preponderate, houses are packed together, though not so closely, as on the East coast. These are found mostly in towns and other trade centres.

26. The State is divided into six taluks and these are sub-divided into 273 villages for administrative purposes. With regard to the physical aspects of the country the State can be divided into three parts the hills, the plains and the seaboards as the country stretches towards the sea. The density of population in the State varies in different villages, those bordering the sea and the backwater being more densely peopled than those in the plains or hills. The major portion of the hills are uninhabitable being covered with thick forests and frequented by wild animals. The taluks of Cochin-Kanayannur and Cranganur bordering the sea and backwater are mostly densely peopled, the density being 1,768 and 2,048 respectively, while Chittur and Mukundapuram, the major portions of which are covered by forests, have a density of only 325 and 409 respectively. In the former taluks there is no uninhabitable or uninhabited area. The improvement of the Cochin Harbour will stimulate industry and commerce and bring in their train a large number of immigrants from foreign parts. Accommodation for the construction of houses,

shops and warehouses is limited and the less fortunately situated people in the Cochin-Kanayannur taluk will have ere long to find other places to live in.

27. The distribution of population between towns and villages is shown by taluks in Imperial Table I and Subsidiary Table I of this Chapter. It will be seen therefrom that 13 per cent of the people of the State live in towns as against 12 per cent in 1911 and 10·7 per cent in 1901, the percentage for Travancore being 10 and that for Malabar and the Madras Presidency 7·6 each. The inducements to live in towns appear to be increasing on account of facilities for trade and commerce, education, higher wages and so many other kindred causes. The natural aversion of the Malayalees to live in closely-built houses with little or no compound has been a hindrance to the growth of towns in Malabar. Of the nine towns, four are Municipal and the rest Non-municipal. Ernakulam, Mattancherry and Trichur are the only three towns which are urban in their character. Each of these contains over 23,000 inhabitants. The population of the Chittur-Tattamangalam town is only 18,150. This town is more an agricultural centre than industrial. As already described, tendency to migrate to towns is increasing now-a-days, the urban population having increased by 15·6 per cent, though the population as a whole has increased only by 6·6 per cent. The Hindus form 49 per cent of the population of the important towns of Ernakulam, Mattancherry and Trichur, while the percentage of Musalmans and Christians living in those towns are 12 and 37 per cents, respectively of the total population of those towns. Mattancherry is the only town in the State which looks like Bombay in a miniature scale. The house sites here are limited and in certain cases 10 or 12 families live in one and the same building. With the development of the Cochin Harbour, the town is destined to play a very important part and the necessity and competition for more house sites will all the more be keenly felt.

SUBSIDIARY TABLE I.

Distribution of the population between Towns and Villages.

CHAPTER III.

BIRTH PLACE.

28. Imperial Table XI exhibits the statistics of birth place for the population enumerated in the State as a whole, and the Subsidiary Tables at the end of the chapter give the number of people born outside the State and enumerated in the State and those born in the State but enumerated outside the State. Out of the total population of 979,080 in the State 939,321 were born in the State. As a stay-at-home people, the Cochinites are usually found confined to their homes or to their immediate neighbourhood, and emigration from the State plays but a very unimportant and insignificant part. As the means of existence become more and more acute, people will naturally be forced to migrate in large numbers notwithstanding the barriers of caste prejudices, social ties, etc., which now operate as sources of hindrances to such movements.

29. Five different kinds of migration have been noted by the Census Commissioner, viz., (1) casual (2) temporary (3) periodic (4) semi-permanent and (5) permanent. The birth places recorded at the census do not give information about the character of the different kinds of migration, and the so-called test of proportion of sexes is the only test available to decide to which of the above classes a particular emigrant belongs. But, as already observed, as emigration and immigration do not play an important part in the State, detailed consideration of this otherwise important question need not be taken up.

30. Out of 39,759 immigrants 54.5 per cent are from British Malabar, 31.1 per cent, from Travancore and 5.9 per cent, from Coimbatore. The decrease in the number of immigrants as compared with 47,266 immigrants in 1911 seems to have been due to the slump in the rubber trade and consequent reduction of work in rubber plantations and the deterioration of coffee and tea plantations on the Nelliampatis. As in the previous decades, South Canara and Tinnevely have also contributed their share of the immigrants though to a less extent than in the previous decade. The immigrants from the districts in the Madras Presidency number 26,381 and those from Travancore and Pudukkottai number 12,389. Of the remaining, 462 are from Kathiawar and 477 from Bombay. These are mostly Baniya and Muhammadan merchants found in Mattancherry and its neighbourhood.

31. Full statistics relating to emigrants from the State are either not available or have not been received by the time this report was sent to the Press. According to the statements received from the Provincial Superintendents 23,512 persons born in the State have been enumerated outside the State. Travancore, Malabar and Coimbatore have enumerated 12,336, 6,331 and 1,544 respectively. All these three places adjoin the State boundaries, and hence the majority of the emigrants have probably only stepped over the boundary line. 867 Cochin-born persons have been enumerated in Madras, and 469 in Bombay. The majority of the emigrants to Madras are students prosecuting their studies in the various colleges there.

32. The total number of immigrants into the State is 39,759 and that of emigrants 23,512. The net result therefore is a gain of 16,247 persons to the State as against 22,219 in 1911.

Loss or gain by migration.

CHAPTER IV.

RELIGION.

33. Imperial Table VI, Provincial Table II and Subsidiary Table I show the general distribution of the population by religion; distribution by districts of the main religions is exhibited in Subsidiary Table II, while Subsidiary Table III shows the actual number of Christians and their variations and Subsidiary Table IV, religions of urban and rural population.

34. Religion is more or less a matter of profession and no alteration in the significance of the term was made during the Census. The Enumerators were instructed that the religion to which a person claims to belong should be entered without any question. The figures shown in the margin compare the distribution by religion and relative growth or decline with those of 1911. The variations in different religions are noticed in the following paragraphs dealing with each religion.

Distribution and variation since 1911 and relative growth of different religions.

Religions.	1921.	1911.
Hindus	646,132	615,708
Musalmans	68,717	63,822
Christians	262,595	233,092
Jews	1,167	1,175
Animists	368	4,177
Others	101	136

the margin compare the distribution by religion and relative growth or decline with those of 1911. The variations in different religions are noticed in the following paragraphs

35. Who is a Hindu and what is Hinduism have been discussed in previous Census reports and other published books. There is hardly any necessity for me therefore to go over the question again. It will however be wrong to exclude from "Hinduism" any form of belief or practice which is akin to "Hinduism" and not distinctly foreign to it.

36. Sixty-six per cent. of the population are Hindus, and they form the predominant portion of the population in the State as a whole and also in every one of the Taluks.

Sects.	1921.	1911.
Nambudri Brahmans	5,427	5,520
Other Brahmans	34,941	30,012
Kshatriyas	1,649	1,594
Ambalavasis	8,079	7,804
Nayars	131,054	121,206
Iluvans	224,008	208,453
Other Hindus	240,974	241,119

The marginally noted figures compare the population under different sects of Hindus with the corresponding figures according to previous Census. It will be seen from those figures that, as elsewhere in the

West Coast "Iluvans" and "Other Hindus" form the bulk of the Hindu population. There is no doubt a reasonable demand from these communities for social and economical advancement. At present they furnish labour for agriculture and other industries. The Nambudiri community like that of Jews is showing signs of decadence. This cannot but be attributed to the peculiar customs of marriage, etc., still obtaining in this community. In thirteen villages in the Cochin-Kanayannur Taluk, three in Mukundapuram, three in Trichur, and one each in Talapilli and Chittur, Christians predominate, while in Azhikode in Cranganur, the Musalmans predominate. But there are several villages where neither Christians nor Muhammadans are found. During the decade the Hindus have advanced in number from 615,708 in 1911 to 646,132 in 1921, thereby

showing an increase of only 5 per cent., as against an increase of 11 per cent. in 1911, while the population as a whole has increased by 6.6 per cent.

37. The Muhamadans form only 7 per cent. of the total population of the State. They are relatively strongest in Cranganur being 25 per cent. of the population of the Taluk. A little over 82 per cent. of Muhamadans are "Mappilas" the majority of whom are the descendants of converts in old days. There are now in the State 68,717 Muhamadans, as against 63,822 according to the last Census, or an increase of 4,895 or 7.6 per cent.

38. There are now, according to the present Census, 262,595 Christians as against 233,092 in 1911 the proportional increase being only 13 per cent. as against 17 per cent. according to the previous Census. They form 27 per cent. of the total population of the State. The advance in the strength of Christians in all the Taluks has been generally progressive as the figures shown in

the margin will illustrate.

39. As in the last Census, Christianity is the only religion in the case of which statistics of sects in the present Census were collected. The figures quoted in the margin will exhibit the various

Sects.	1921.	1911.
Roman Catholic (Latin) ...	108,739	97,787
Syrian (Chaldean) ...	1,822	12,157
Do (Jacobites) ...	24,325	20,025
Do (Reformed) ...	3,692	596
Do (Roman) ...	120,372	100,166
Protestant ...	3,645	2,362

sect as compared with those of 1911. The marginally noted statement shows a decrease in the number of Syrian (Chaldean). My enquiry goes to show that this reduction is mainly attributable to a large number of them having become Syrian (Roman) out of social necessities.

40. To obviate possible mistakes in this direction the various heads of Christian Churches were requested to instruct their respective congregationaries with regard to the answers to be given to the Census Enumerators and Supervisors. Enumerators were also supplied with printed copies of the various Christian sects supplied by the Census Commissioner. These precautions have enabled them in making the record of Christian sects more or less accurate.

41. It has been suggested by the Census Commissioner that in view of the influence of missionary propaganda the subject of conversions must receive some attention. The Church Missionary Society, the Church of England Zenana Mission, Leipzig Luthern Mission, Nagal Mission and a few others are at work in the State. Their efforts to make conversions do not meet with the success which they enjoyed in the olden days. On account of some social disadvantages under which certain classes of Hindus were labouring, converts to Christianity in the past were plenty. With the advancement of education, these socio-religious distinctions—such as unapproachableness—are fast dying out and with it the necessity for embracing Christianity is also dying out. Conversions to Christianity have now become few and far between, and the stray converts that are now obtained are only from the classes of Hindus which are lowest in the social scale.

42. Jains, as enumerated in the State, are very few in number when compared with other religionists, their strength being only 101, as against 129 in 1911 and 5 in 1901. I do not deal in

detail with the two main sects, Digambaras and Sweetambaras, into which Jains are divided, as their strength does not make an appreciable proportion to the total population.

43. The Jews form one of the oldest communities in the State. Their settlement in Mattancherry is more than 20 centuries old. There are now 1,167 Jews in the State as against 1,175 in 1911. The growth of the population of this community has thus practically remained stationary during the decade. However enterprising or progressive this community may be elsewhere in other countries, their prospects do not seem to be promising in the State. The majority of the Jews are found in the Towns of Mattancherry and Ernakulam and the rest in Chennamangalam in the Cochin-Kanayanur Taluk and Mala in the Mukundapuram Taluk. They are divided into two classes, white and black; but who are the first settlers on this coast is a disputed question which has not been satisfactorily solved.

44. No sharp line of demarcation can be drawn between Animists and Hindus, and the Animism was separated from Hinduism during the Census of 1901. An ordinary Enumerator cannot be expected to draw the distinction between the two, and they were therefore instructed to record Kanakan, Parayan, &c., as Hindus to which class they really belong, and to enumerate all hill tribes as Animists except those among them who wished to be returned as Hindus. There are now accordingly 368 Animists according to the present Census as against 4,177 according to the previous Census, thereby showing a decrease of 3,809 or 91 per cent. The decrease is due partly to natural decay and exodus from hills for want of work, and partly to the probable inclusion of Hindus among Animists during the last Census. They are now found only in the Mukundapuram Taluk. The Chittur Taluk which returned 2,418 Animists during the previous Census, has not returned a single Animist this time thereby showing exodus in large numbers from the Nelliampatis on account of the decline in the coffee cultivation there.

45. There are all told 2,734 places of worship in the State of which 2,325 are Hindu temples, 146 mosques, 256 Christian churches and seven synagogues as against 2,286 temples, 125 mosques, 249 churches and seven synagogues in 1911. There is thus one temple for every 278 Hindus, one mosque for every 471 Muhamadans, one church for every 1,026 Christians and one synagogue for every 167 Jews. As during the last Census the Jewish synagogue remained stationary.

SUBSIDIARY TABLE I.

CHAPTER V.

AGE.

46. The most interesting and important feature of a Census is the statistics provided by the age returns. Mis-statement of age either unintentional or deliberate is common and the returns of age are therefore rendered inaccurate. A detailed handling of the figures in a small State like Cochin is not therefore deemed necessary and any inference drawn from inaccurate figures will not be of use for practical purposes.

The nature of the return of age.

The age statistics of the population are embodied in Imperial Table VII, while the Subsidiary Tables I to X attached to this Chapter relate to all important features of age statistics.

47. The term signifies the mean age of the living, that is, of the persons enumerated. In his notes, the Census Commissioner says that the mean age does not coincide with the mean duration of life except where the births and deaths exactly balance one another. In a growing population with a large number of children, the mean age of the living will be less than in a decadent one where the children are relatively few in number. The mean age in itself therefore explains nothing. The mean age of the living in the State as a whole is 24.06. Of the main religionists, Hindus, Muhamadans and Christians, the mean age for Hindus is 24.5, for Muhamadans 23.06 and for Christians 22.4. The mean age for Jains is 22.92 while for Jews and Animists it is 35.8 and 26.04 respectively. These ratios are calculated with reference to the total population including children in each religion. The lower the mean age the greater must be the birth and death rates.

The mean age

48. Subsidiary Tables IV, IV A and V at the end of the Chapter show the proportion of each sex in each religion who are found at each period. The Hindus form the major portion of the population of the State, and hence it is only natural that more children are found among them. Christians and Muhamadans then follow in the order of the strength in population.

Age distribution by religion.

49. Subsidiary Table IV at the end of the Chapter shows the age distribution of each sex in certain selected castes. It discloses a variety of features, and no general inference can be drawn on the strength of the figures therein recorded.

Age statistics by Caste.

50. Of the total population 13.6 per cent. are children in the age period of 0—5, and boys and girls in this period are almost equibalanced. Five are widowed in the age period 5-10, of whom one is a widower and four are widows. Of the latter, three are Hindus and one is a Muhamadan. The one boy widower is a Muhamadan. More than half the population are unmarried. In the reproductive age period of 15—40, there are 32,885 unmarried women and 149,674 married women.

Infancy and childhood.

SUBSIDIARY TABLE 1.

Age distribution of 100,000 of each sex by annual periods.

Note.—Figures by sex are not available.

CHAPTER VI.

SEX.

51. In the countries of Western Europe, the females are in excess of males, while in India the males preponderate females. The western critics of Indian Census therefore are of opinion that there are *a priori* reasons for believing that the enumeration of females in India may be imperfect. If the preponderance of females over males in Census returns is the test of the accuracy of Census figures, there can be no hesitation in saying that the Census of 1921 in the State has been quite accurate. According to the recent Census there are 1,027 females for every 1,000 males, as against 1,007 in 1911, and the female population used to outnumber the male population ever since 1881 thereby giving collateral testimony to the accuracy of the recent Census returns. This preponderance of women in successive Censuses coupled with their high education is sufficient reason for their claims to civic recognition.

52. At the Censuses of 1891, 1901, and 1911 the females outnumbered the males in all Taluks except Cochin-Kanayannur and Cranganur; while according to the recent Census, same has happened to be the case in the Mukundapuram Taluk also. No reason can possibly be adduced for the deficiency of females in this Taluk, except upon the supposition that influenza differentiated against females, or scarcity against males; the decrease in the Cochin-Kanayannur Taluk may probably be due to, as observed in the previous Census reports, the existence there of a large number of temporary male residents for business purposes, especially in Mattanchery, Ernakulam and Tripunittura and in their neighbourhood. With the development of the Cochin Harbour and the consequent better facilities for trade and commerce, the males in this Taluk are likely to show a more marked increase in their number in future Censuses.

53. Females preponderate over males among Hindus only, while males outnumber females among all other religionists. In the Taluks of Trichur, Talapilli and Chittur the females among Christians preponderate over the males; and females outnumber males among Muhamadans in Talapilli and Chittur Taluks.

54. The age and sex statistics show a variety of features, so much so that no general inference can be safely drawn from the figures or explanation given for the different varieties. Up to the age of five there are more females than males but more boys than girls are seen during the age periods of 5-15. The table then turns in favour of females and we find more females in the age periods of 15-35. From 35-50 there are more males than females though after 65, females are considerably in excess of males. There are now five centenarians in the State of whom two are males and three females.

SUBSIDIARY TABLE I.

CHAPTER VII.

CIVIL CONDITION.

55. In writing this Chapter I have prominently kept in view the Census Commissioner's instruction that "on the present occasion the discussion should be primarily based on the statistics and should be confined to such aspects of the general subject as arise out of the figures or are connected with them as influences explanatory of the variations". All that can possibly be said on the subject of marriage has been said in the previous Census reports, and there has been no modification during the last ten years in the attitude of the different communities towards marriage, divorce, etc. The most noteworthy feature to be mentioned here is the passing of a social legislation legalising the marriage among Nayers in the State. Till the passing of this Act the Nayar Sambandhams were not recognised in Law Courts though socially they were considered to be valid. The leading Nayers desired to remove this anomaly and represented their case to the Government. The Cochin Nayar Regulation XIII of 1095 legalising marriage and its dissolution was accordingly enacted during the decade. The Christian Civil Marriage Regulation was also passed into law during the decade.

Introduction.

56. Imperial Table VII gives the statistics of civil condition by age, sex and religion while Imperial Table XIV gives similar statistics for selected castes and tribes.

Reference to statistics.

57. Of the male population in the State 57·8 per cent. and of females 45·2 per cent. are unmarried. There are 78,374 widows and 19,867 widowers; that is, for every widower there are 4 widows in the State. With reference to age, the males return 41 per 100 as single at the ages below 15, the proportions for females being 33 per 100. In the reproductive age period of 15—40 unmarried males form 16·5 per cent. of the total number of males, while unmarried females form only 6·6 per cent.; but at the ages of 40 and over the unmarried males form 4 per cent. and females 3 per cent. of their respective total strength. There are only 13 widow girls for every ten thousand girls at the age period of 10—15 and one boy widower for the same number. A widower, especially a young widower, during one Census, will be a married man, and not a widower, at the next Census. Similarly in the case of young widows where widow marriage is not prohibited, a widow of one Census may not be a widow at the next Census. These figures also include persons divorced, majority of whom will sooner or later get married. The figures therefore lose much of their importance. All that can be said is, that on the night of 18th March 1921, there were 78,374 widows and 19,867 widowers. Comparison with other Provinces and States is not possible as latest figures on the subject for the decade have not been received. It may however be safely inferred, from knowledge of conditions prevailing in the State, that universality of marriage, juvenile marriage and enforced widowhood are not certainly more perceptible in Cochin than elsewhere.

Main feature of the statistics.

58. Of the total number of Hindus in the State, of and about the age of ten, it is seen that out of 43,113 males 43,109 or 99·9 per cent. are unmarried, and of 42,214 females of the same age period 42,137 or 99·8 per cent. unmarried. Among Christians of the same age 99·98 per cent. of males and 99·94 per cent. of females are unmarried, while among

Variation by religion.

Muhamadans 99·94 per cent. of males and 99·81 per cent. of females are unmarried, The widows among the Hindus come to 8·9 per cent. of the total number of Hindus, while among Christians and Muhamadans to 6·1 per cent. and 6 per cent. respectively. The large number of widows among Hindus is due to prohibition of widow marriage among Brahmans ; but the reason for a large number of Christian widows especially girl widows is not understood. There are no widowers or widows in the age group 4 —5.

59. Higher education among women was unheard of even some 30 years ago ; but the old order of things has completely changed, Education and marriage and women along with men have now begun to prosecute their studies for higher education. This has also awakened in the women of the State a consciousness of their ability to earn a livelihood independent of their husbands, and the facilities given by the State towards the achievement of their laudable object to become educated, has lessened the marriage rate and probably early widowhood also. During the last decade the number of female teachers has increased by 108 per cent., while the number of girls undergoing education has increased by nearly 14,000.

CHAPTER VIII.

LITERACY.

60. The system of dividing the population into literate and illiterate introduced in 1901 was continued at the present Census and it was laid down in the instructions for the Census staff that a person should be regarded as literate if he could write a letter to a friend and read the answer to it, but not otherwise. In the case of students also, the above rule was observed. No record was made of the vernacular language or script in which each person was literate.

The meaning of the statistics

61. Statistics of education by religion and age are given in Imperial Table VIII and of education by selected castes and races in Imperial Table IX. Subsidiary Tables I to VII appended to the Chapter will illustrate the main features.

a. Reference to statistics.

62. According to the Census returns the number of persons able to read and write is 181,410 of whom 132,090 are males and 49,320 females, as against 139,093, 111,146 and 27,937 respectively in 1911. In other words in every 1,000 of the total population 185 are literate, as against 151 in 1911. In every 1,000 males 274 are literate and in an equal number of females 99 are literate, as against 243 and 61 respectively in 1911. The figures showing the extent of literacy for other States and

Extent of literacy.

Number of literates in 1000 in 1921	Males	Females
Cochin	274	99
Travancore	331	150
Malabar	209	49
South Canara	162	28
Tanjore	248	24
Madras City	453	174
do Presidency	152	21
Baroda	210	40
Mysore	143	22
Hyderabad	27	8

Provinces are given in the margin.

63. The tables give the figures for literacy by four age periods, namely, 0—10, 10—15, 15—20, and 20 and over. The disparity between the number of literate males and that of literate females is not so very striking, as in 1911. For every 100 literate males, there are in the State 37 literate females, as against 25 according to the previous Census, thereby showing a rapid increase in female education.

Literacy by age and sex.

64. In point of literacy the Jains stand at the head of all religionists, the literates among them numbering nearly 36 per hundred 33 being males and the rest females. These are closely followed by Jews among whom there are 28 literate persons per hundred 19 being males and the rest females. Excepting the Animists, the Muhamadans come last in point of literacy as there are only 9 persons out of every hundred who are literate eight being males and the rest females. Among Hindus the literates number 16 per hundred 12 being males and the rest females. While among Christians there are 26 literates for every hundred persons 18 being males and the rest females. The low percentage of literacy among the Hindus is on account of the backward condition of those sections of the Hindus who are on the lowest rungs of the ladder in the social scale, such as, Pulayans, Parayans, Iluvans, Kammalans, etc.

Literacy by religion.

65. There are now in the State 18,006 persons who can read and write English. Of these 14,730 are males and 3,276 females. Literacy in English. There were only 10,512 persons who were literate in English at the Census of 1911. The literates in English therefore come to 30·5 in a thousand males and 6·6 in an equal number of females as against 20 and 3·1 respectively in 1911. As in the previous decades, the progress is most marked among Tamil Brahmans, Malayalee-Kshatriyas, Nayars and Indian Christians. The Nambudiris also have advanced considerably in this respect. There were only 7 in a thousand who were literate in English in 1911 ; there are now 25 in one thousand. It is curious to note that among Velakattalavans (Barber caste) there are six females literate in English while there are only four among males.

66. In olden days primary education was conducted in *Pial* Schools by Eluttassans, the hereditary village school masters. Every village contained many such schools according to the size and importance of the village. The education was then given free, each pupil having to contribute only three pies to half an anna and half a measure of rice every fortnight. Primary or elementary education was brought under Government only in 1890, and these village schools then gradually began to disappear. The Education Code of Cochin came into force on the 15th June 1911. It has therefore now been working for 10 years. Boys' Schools have since increased by 64 per cent. and Girls' Schools by 43 per cent. Two Colleges are now imparting higher education as against one in 1911. Upper Secondary Schools have doubled in number and Lower Secondary Schools have increased by 79·4 per cent., while Primary Schools have increased by 65·6 per cent. As against one school for every village, there are now practically two. 12·9 per cent. of the males and 6 per cent. of the females are now at school as against 7·1 and 3·1 respectively in 1911. 16,688 pupils of the backward classes are now receiving instruction as against 3,256 in 1911. Girls numbering 24,131 are undergoing instruction in various schools as against 10,365 at the beginning of the decade. There are now 7 Girls' High Schools in the State. The more useful and important system of education given in these institutions has more than compensated for the disappearance of the old *Pial* Schools.

67. Subsidiary Table VII gives the number of the institutions and pupils according to the returns of the Educational department. One-sixth of the gross revenue of the State is now spent on education. From Rs. 2,79,000 at the beginning of the decade the expenditure on education has now gone up to Rs. 9·5 lakhs. The results of the University Examinations are given in Subsidiary Table VIII. Statistics of students who go outside the State for their degrees in Arts, Law, Medicine, Engineering, etc., are not available.

68. The Draft Regulation for the compulsory registration of books now under the consideration of Government, has not yet come into law and it is not accordingly possible to ascertain the extent of literary activity in Cochin. The number and circulation of newspapers and magazines published in the State are given in Subsidiary Table IX. There are no Vernacular or English daily newspapers in the State ; there are, however, seven Malayalam weeklies and one English weekly and Latin monthly.

SUBSIDIARY TABLE I.

Education by age, sex and religion.

CHAPTER IX.

LANGUAGE.

69 Languages spoken in the State are recorded in Imperial Table X, while the Subsidiary Tables at the end of this Chapter exhibit the main facts in proportional and condensed forms. 20 languages spoken in Cochin have been recorded at the present Census. The number of speakers of each language counts from '0002 per cent. to 90·2 per cent. of the total population. These are arranged under three main groups, viz, A—Vernaculars of India; B—Vernaculars of other Asiatic countries; and C—European languages. Vernaculars of India are sub-divided into Vernacular of the State and Vernaculars foreign to the State. The Provincial Table Appendix IV shows the languages spoken by the population in different Taluks.

70. Malayalam is the language of the country and the official language of the State, though the major portion of the official correspondence is now carried on in English. It is spoken by 882,822 persons, or over 90 per cent. of the people. The Malayalam spoken by Pulayas and Parayas differ considerably from that spoken by other Malayalam speaking people, but the difference is not so great as to make it a separate dialect. Malayalam is the mother tongue of 89·6 per cent. of the people in Cochin-Kanayannur Taluk, 92·1 per cent. in Cranganur, 96·5 per cent. in Mukundapuram and Trichur, 94 per cent. in Talapilli and 57·8 per cent. in Chittur. As Malayalam is the medium for imparting elementary education in the State, many people who have returned vernaculars foreign to the State as their household language are literate in Malayalam and not in the language which they have returned as their mother tongue. This is particularly noticeable among those who have returned Tamil and Konkani as their parent tongue.

71. Tamil is the mother tongue of 57,574 persons or 5·9 per cent. of the population, and is the most widely prevalent language in the State next to Malayalam. The majority of those who have returned Tamil as their mother tongue live in the Chittur Taluk. The Tamil speaking people in the remaining Taluks together comes to only 3 per cent. As in the case of Malayalam, Tamil spoken by goldsmiths and chetties differs perceptibly from the Tamil spoken by Brahmans. The former is only an incongruous mixture of Malayalam words with Tamil verbal inflections.

72. Hindustani is returned by 2,341 persons who are Musalmans, Telugu by 8,901, Gujarati by 1,342 and Marathi by 3,013 who are Konkani Brahmans. The language spoken by the majority of Konkani Brahmans is only a dialect of Marathi called Konkani. This dialect is spoken by 17,604 persons including Kudumi Chetties.

73. 580 persons or '06 per cent. of the total population have returned non-Indian languages as their mother tongue and 7 such languages have been recorded. The number of persons who have returned "English" as their mother tongue has fallen from 412 in 1911 to 324 in 1921, while the Portuguese speaking people have fallen down from 237

to 50. The fall in the number of English speaking people is due to the reduction in the strength of Anglo-Indians who number only 2,183 as against 2,446 in 1911.

74. A certain amount of literary activity is going on in the State, but progress has hitherto been slow. Public service and practice of law demand English educated men; so also commerce and industry. Rich literature in vernaculars has therefore very little attraction for the public. It is not even the accepted medium of higher education and it would be no wonder if at the next Census an Indian gentleman with his english-educated wife returns "English" as the language ordinarily spoken in the house. Correct statistics of literary production are not available as there is no provision in the State for registration of books. The introduction of such a Regulation in the State is now engaging the attention of the Government, and a draft Regulation has been published for public criticism.

CHAPTER X.

INFIRMITIES.

75. Imperial Tables XII and XII-A give statistics of those afflicted with infirmities of various sorts, and the Subsidiary Tables at the end of the Chapter exhibit the main features in condensed forms. As on previous occasions statistics relating to insanity, deaf-mutism, blindness and leprosy were recorded; but at the previous Census it was laid down that only those persons who were deaf and dumb from birth were to be shown as deaf-mutes. At the recent Census, under instructions from the Census Commissioner, this limitation was done away with.

Accuracy of the return.

Statistics relating to infirmities cannot be free from mistakes partly due to difficulties in accurate diagnosis and partly due to wilful concealment. An ordinary Enumerator can understand insanity in the violent form of mental derangement, or insanity properly so-called; but idiocy is very often left out from this class of infirmity. The danger of wilful concealment is greatest in the case of leprosy especially when the leper is a member of a respectable family. In the case of children suffering from any of these afflictions the parents may not be willing to recognise or reveal the disease. Enumerators also rather feel delicate to minutely question the parents regarding cases of infirmities in the family. The task of collecting reliable statistics is thus beset with innumerable difficulties. The machinery employed for the collection of these statistics is also imperfectly adapted to furnish the required data. The following instructions were issued to Census Supervisors and Enumerators in filling up column "infirmity".

"After the inmates of a family have all been enumerated, the Enumerator should read out the heading of column 16 to the principal man and ask him if there are any persons in his family suffering from any of the infirmities specified therein. If his answer is in the affirmative, the necessary entries should be made against the persons afflicted. If any person be totally blind in both eyes, or both deaf and dumb, or insane, or suffering from corrosive leprosy, enter in this column 'blind', 'deaf-mute', 'insane', or 'leper' as the case may be. Do not enter those who are blind in only one eye, or not both deaf as well as dumb, or have only white leprosy".

76. There is a Leper Asylum in the island called Venduruthy in the Cochin back water of the Cochin-Kanayannur Taluk and a Lunatic Asylum in the Trichur Taluk. The locality for the Leper Asylum in the Cochin-Kanayannur Taluk was found unfit for the purpose and its removal to Trichur is pending the completion of construction of an up-to-date Asylum in an isolated locality in the Trichur Taluk near "Anapara". A Regulation for the compulsory removal of pauper lepers to the Asylum has been passed, but compulsory removal to and detention in the Leper Asylum are not yet enforced. There were 27 lepers at the beginning and 94 lepers at the end of the decade in the Leper Asylum. The number of lunatics at the beginning and end of the decade in the Lunatic Asylum were 15 and 13 respectively.

Leper and Lunatic Asylums.

Among the insanes one Hindu female, one Christian female and one Christian male are blind and two Hindu males and one Christian female are

deaf-mutes. Among the deaf-mutes one Hindu male and two Christian females are blind. One Hindu male who is a deaf-mute is also a leper.

77. The numbers returned as afflicted are shown in the margin, as compared with those returned at the previous four Censuses. The numbers afflicted in every 100,000 of the population at

Year	Insane	Deaf-mute	Blind	Lepers
1881 ...	103	235	281	148
1891 ...	213	397	868	250
1901 ...	197	549	886	331
1911 ...	292	331	1,185	461
1921 ...	381	504	1,250	466

each of these Censuses are given in Subsidiary Table I. The most important noticeable feature is the ever-increasing number in each succeeding Census of those who are returned as blind. From 281 in 1881 it has at the last Census reached the figure of 1,250 and of this

number 637 are females and 613 males. Both males and females engage themselves in out-door work in ever-increasing numbers, and thereby expose themselves to heat and glare and dust ; this and various other causes must have contributed to the increase in those returned as blind. Exposure to smoke by cooking in ill-ventilated kitchens accounts for increased blindness among females. The increase among insanes must, to an appreciable extent, be due to excessive use of alcohol and the stress and strain of life. The increase under deaf-mutism calls for no special remarks as at the previous Census only those who were deaf-mutes from birth were recorded as such ; but as this distinction was now done away with, the increase is only natural. Lepers also are on the increase but the increase is so small that it calls for no remarks.

78. Numerically more insane people are found in Cochin-Kanayannur Taluk but Trichur has got more deaf-mutes closely followed by Cochin-Kanayannur. The blind are more numerous in Trichur and Talapilli than in any other Taluk. Out of 466 lepers in the State 255 are in the Cochin-Kanayannur Taluk, of whom 94 are the inmates of the Leper Asylum. This is, of course, a very high figure when compared with the number in each of the other Taluks. Putrified and deleterious food leads to leprosy and a good deal of putrified fish is consumed by the lower classes of people in this Taluk and hence the increase of this infirmity in this locality.

79. Out of 2,586 persons afflicted, 1,431 are males and 1,155 are females. In all except blindness, the males preponderate the females but in blindness the females are slightly in excess of males there being 637 females to 613 males. The figures in the

Infirmities by Age and Sex.

Number of females to 100 males afflicted.			
Insane	...	...	79
Deaf-mute	...	...	85
Blind	...	...	104
Lepers	...	...	37
Total	...	...	81

margin show the number of females to one hundred males afflicted. More insane persons are found in the quinquennial age periods of 20—40 after which their number is found steadily on the decrease as ages advance. More deaf-mutes are however found between the age periods of 10—20, and more blind are seen among the age periods of 15—55. In the age periods of 70 and over the afflicted females considerably out-number afflicted males.

80. Table XII-A shows infirmity by selected castes and tribes. As the total of the afflicted is not very great it is not necessary to deal with each and every caste. Out of the 381 persons afflicted with insanity, 110 are Indian Christians, 75 Iluvass and 45 Nayers. Among deaf-mutes also Indian Christians outnumber the other castes. There are 155 deaf-mutes among them. Iluvass come next with 99 and Nayers with 52. Among the blind 282 are Iluvass, 269 Indian Christians and 231 Nayers. 157 Indian

Infirmities by Castes, etc.

Christians, 113 Iluvass and 45 Nayarars are lepers. It has to be pointed out that Indian Christians form the majority of the population and that next to them come Iluvass. So these infirmities are usually in proportion to the total population of each community. Among Pulayans there are 46 lepers and 88 blind. The Table presents a variety of features and it is not possible to offer any reasonable explanations for this.

CHAPTER XI.

CASTE, TRIBE AND RACE.

81. Imperial Table XIII shows the distribution of the whole population by Caste, Tribe and Race, which have been arranged alphabetically under each Religion, while Provincial Table Appendix III exhibits their distribution by Taluks. Wrong entries either due to ignorance or mis-statement were found in many of the schedules, but as the Enumerators had been directed to show the name of the caste sub-division below the caste name, it was possible, in the Tabulation Office, to correct a major portion of the mistakes committed during enumeration. The whole of this subject has been fully dealt with by M.R.Ry. Rao Bahadur L.K. Anantha Krishna Iyer Avl., the late Curator of the State Museum, in "The Cochin Tribes and Castes" and a detailed handling of the subject in the Report is therefore deemed unnecessary. The sixtyfour castes of Malabar are comprised in the four-fold caste system or "*Chathur Varnyam*" of the Hindus; and to attempt to trace the history and origin of all these castes is to attempt the impossible. The origin of most, if not all, of these castes is more or less involved in mysteries and traditions, and authentic information is not available, though ethnographic enquiry has been gone into. A glossary of different castes found in the Table is, however, appended at the end of the Chapter.

82. Social precedence, caste rules and restrictions and caste Government as they once existed or still exist have been dealt with in the previous Census Reports. The caste system continues to reign over the Hindu community as well as among other communities in the State though its rigours are considerably on the decline on account of the altered political and social conditions. The pressure upon the means of subsistence and the high cost of living, the inadequacy of wages in traditional and hereditary occupations, the unprofitable nature of village industries and consequent migration to urban areas and the present system of education in public institutions are all paving the way for the fusion of different castes or at least to account for the present tottering condition of the old social and religious practices and observances. The caste system is slowly but steadily made into the class system of the west. The change is perceptible in towns and it is gradually permeating among the people in rural parts also. Caste tribunals have ceased to exist and if it exists anywhere its decisions are not respected. His Highness the Maharaja is the final authority in all religious questions among Namboodiris and Malayali Kshatriyas and Sudras in the State.

83. The Subsidiary Table II gives the strength and variation since the last Census of the various castes. The castes with the greatest strength are Indian Christians (260,347); next come Iluvans with a strength of 224,008; Nayars come third, their strength being 131,054. In point of numerical strength (69,423) the Pulayans take the fourth place. The Musalmans (Jonakas) and Tamil Brahmans come next with 56,018 and 21,836 respectively. While the Hindus as a whole have increased by 5 per cent. during the decade, some of the castes show decrease in their strength. It is not easy to offer explanation for this variation. It is probably due to ignorance on the part of these people to differentiate their caste names and probably to the

abnormal conditions which prevailed during the latter part of the decade which operated as a severe check to the natural growth of population. Consequent on the representations made by the community, the term "Eluttassan" has been substituted this time for "Kadupattan" of the last Census, with the approval of the Government.

SUBSIDIARY TABLE I.

Note.—Net variation in periods 1891—1921 has been given in all cases wherever available, while in the case of Black Jews, white Jews, Jains and Vannan the figures indicate the net variation in the period 1901—1921 and of Kavundan in the period 1911—1921, those for the rest being in the period 1891—1921.

Glossary of Castes, Tribes and Races.

(THOSE INCLUDED IN TABLE XIII.)

Note --*The figures entered after each name represent the strength of the caste.*

ADIKAL (23).—Originally a class of Brahmans deputed to perform religious rites in Bhadrakali temples. They therefore lost their original status and now do various temple services. They follow the Makkathayam system of inheritance and their women are called Adiyammas.

AGAMUDAIYAN (81).—A certain cultivating class found in the easternmost villages of the Chittur Taluk. Their mother tongue is Tamil.

AMBALAVASI (8,079).—Literally means one who lives in temples. Their hereditary occupation is temple service. They are supposed to be degraded Brahmans and the word is a generic name for a number of castes who are temple servants.

AMBATTAN (1,032).—Tamil barbers.

ANGLO-INDIAN (2,182).—Official name given to Europeans of mixed Indian descent. They were originally called Eurasians.

ARAYAN (5,589).—These are fishermen-like Valans.

BANIYA (336).—Vaisya immigrants from Bombay.

BHATIYA (31).—Another trading caste from Bombay.

BLACK JEW (1,014).—One of the two divisions of Jews.

BORA (49).—Musalman converts from Bombay. They are the only Shiyas found in Cochin.

CHAKKAN (463).—One who drives an oil mill called "Chakku". They are also called Vaniyans.

BRAHMAN (40,368).—One of the four castes into which Hindus are divided.

CHAKKILIYAN (438).—Leather workers of the Telugu caste.

CHAKKIYAR (71).—These are the offspring of adulterous Nambudiri women born after the commencement of their guilt but before discovery and expulsion from caste. Boys so born and invested with the sacred thread become Chakkiyars and those not invested with sacred thread become Chakkiyar Nambiyars. Their profession is to narrate religious stories in temples and Chakkiyar Nambiyars keep time during such recitals. The women of Chakkiyars are called Illodammas and of the latter Nangiyars.

CHAKKIYAR NAMBIYAR (51).—Vide above.

CHALIYAN (2,003).—Cotton weaver.

CHANGAZHI NAMBIYAR (945).—A class of Ambalavasis.

CHETTI (9,163).—This is a titular or occupational term meaning trader.

CHUNNAMBOTAN (3).—A Telugu caste people who deal in chunnam.

DASI (270).—Devadasis attached to Konkani temples recruited from Konkani Sudras.

DEVANGAN (370).—These are generally known as Chetans mostly found in Chittur Taluk and the eastern part of the Talapilli Taluk. Their agnomen is Chetti.

ELAYAD (830).—A class of Malayali Brahmans who suffered degradation either for officiating at the funeral rites of the Nayars or for their having freely partaken of the food served at the anniversaries of Nayars. Their women are called Elormas.

EMBRAN (917).—Tulu Brahman immigrants from South Canara. They are employed as priests in Temples.

ELUTTASSAN (15,197).—This was originally a title given to the learned among Kadupattans. All Kadupattans now assume this title and discard the old name by which they were called. Their occupation was to teach the Sudras. They were Brahmans originally; according to one story they were the residents of Katu Gramam in Chola country. They were gained over to Buddhism and were banished by Chola kings. After considerable hardship they reached Malabar, but Valia Tamburatti of Ambadi Kovilakam, though gave them shelter, decided they had lost their status, hence they were called Kadupattars being the Pattars (Brahmans) of Katu Gramam. Another story while admitting the Brahmin origin of these people says that they lost their status for having eaten Kadu—a kind of fish.

GAVUDA (1,660).—A class of Brahman mendicants.

HANAVI (155).—A Musalman sect.

IDAIYAN (209).—A shepherd caste from Tamil country.

ILUVAN (224,008).—These are called Chogans in Cochin and correspond to Shanans in Tamil Districts. Some of them follow Makkattayam while the rest follow Marumakkattayam law.

of succession. Their headman is called Thandan appointed by His Highness the Maharaja. The Iluvans are supposed to be immigrants from Ceylon.

JONAKAN (56,018).—These are also called Mappilas. These are Musalmans speaking Malayalam. They are descendants of the offspring of mixed union or converts from Hindus. They are all Sunnis.

KACHOHI (73).—A class of Musalmans commonly known as Kachi-Memons.

KADAN (274).—A hill tribe in Nellianpatis and Parambikolam. They may more appropriately be called Vedans.

KAIKOLAN (4,805).—Hereditary Tamil weaver found in Chittur and Talapilli Taluks.

KAKKALAN (508).—A gipsy tribe whose females are professional beggars. The majority of males are mat-makers, and the rest are jugglers and snake-charmers. They are also called Kuravans.

KALLAN (1,135).—A worker in granite.

KALLAR (3).—A Tamil caste meaning a thief.

KALLASARI (2,436).—A mason.

KALLATTU KURUP (151).—A division of Ambalavasis.

KAMMALAN (35,917).—A generic name for the artisan class. They are all still engaged in their hereditary occupations.

KANAKKAN (8,424).—A class of fishermen and boatmen.

KANIAN OR **KANISAN** (2,393).—Professional village astrologers.

KANNADIYAN (56).—Shepherds and cattle breeders of Canarese caste.

KANNAN (120).—These are Tamil Kammalans.

KAVARA (260).—Professional basket-makers belonging to Teluga caste.

KAVUNDAN (6,354).—A division of Kongu Vellalans found in Chittur Taluk.

KAVUTIYAN (603).—The priests of Iluvans but inferior in status to Iluvans.

KOILAN (8,029).—Hereditary blacksmiths known also by the name of Karuvans.

KOMATTI (1).—A Telugu trading class.

KONKANI BRAHMAN (8,080).—A branch of Saraswat sub-division of Pancha Gaudas. They speak Konkani dialect of Mahratti. They are immigrants from Konkani.

KSHATRIYA (1,649).—One of the four castes into which Hindus are divided. They are grouped under four classes, Malayali, Rajput, Raju and others. The first are known as either Thampurans, Tampans or Tirumulpads. The Thampurans are members of the Ruling family, while Tampans are those who lost their political power. The rest are Tirumulpads. Their women are called Tampurattis, Tampattis, and Nambashtaris respectively. Their priests are Nambudiris.

KUDUMI CHETTY (10,323).—These are Konkani Sudras and Konkani Brahmans officiate as their priests.

KURUKKAL (109).—A sub-division of Nayars.

KURUP (903).—A division among Nayars and also a sub-caste of Kammalans. The latter are the priests as well as barbers of Kammalans.

KUSAVAN (3,442).—Potters.

MARATHA (76).—A tribe speaking Mahratti.

MALAYALI BRAHMAN (6,436).—Elayad, Muttad and Nambudiri.

MALAYAN (94).—A hill tribe.

MANAYAR (5).—A sub-division of Nayars consisting originally of 24 families and therefore known as Irupattinalu Manayar.

MARAR (1,447).—A class of Ambalavasis who are temple musicians.

MARASARI (18,555).—Carpenter by occupation. They are a class of Kammalans.

MUDALIYAR (687).—A section of Vellalans.

MUKKUVAN (89).—A caste of fishermen. They are immigrants from Ceylon and are found chiefly on the sea-coast.

MUSARI (946).—Bell-metal worker, a division of Kammalans.

MUTTAD (179).—Malayali Brahmans who suffered social degradation the cause of which is differently told in different parts. Their women are called Manayammas who are ghoshas like the Nambudiri women.

MUTTIRIYAN (7).—A Tamil caste of cultivators and village watchmen.

NAMBIDI (362).—A caste between Nambudiris and Nayars. They wear the sacred thread and are said to be the descendants of certain Brahmans who were degraded for assassinating one of the Perumals. It is also the title of some Nayar aristocrats.

NAMBIDY KURUP (25).—See Nambiyassan below.

NAMBYASSAN (592).—A class of Ambalavasis. They are also called Nambiyar and Unni. Their women are called Pushpanis or Brahmanis. They wear the sacred thread. They are supposed to have been brought to Malabar by Parasurama from outside along with certain Brahmans.

NAMBUDIRI (5,427).—The Brahmans of Kerala. Their women are ghoshas and are called Antarjanams or Akattammars. Only the eldest son among Nambudiris generally marry though there is no objection for all male members to marry into their own castes. The rich and learned and influential among them are called Nambudiripads.

NANJANATTU PILLAI (136).—These are Tamil Vellalas long domiciled in the country. The males wear Malayali dress while their women dress more like Vellala women. This peculiarity can be observed in their marriage system also which is partly Tamil and partly Malayali.

NAYAR (131,054).—The military class of old. There are many sub-castes among them, too numerous to be mentioned here. These distinctions are, however, rapidly dying out. Similarly there are various titles also among them, either conferred or assumed. The middle class usually assume the title of "Menon" but "Nayar" is generally affixed to the name of the poor or illiterate.

NAYADI (119).—An animistic tribe living in the outskirts of the jungles. They are the dirtiest people in the State and even Pulayas and Parayas are polluted by their approach.

ODIYA (89).—An Uriya speaking race.

OTTA NAIKAN OR ODDE (2,437).—These are tank diggers and earth workers. They are said to be the descendants of those who accompanied Tippu Sultan during his invasion of Malabar and subsequently settled down here.

PANAN (2,642).—A caste whose hereditary occupation is sorcery and exorcism. They have lost much of their so-called power in this direction and are now following the peaceful occupation of agriculture and umbrella-making.

PANDARAN (3,560).—Tamil priests and beggars. Most of them who are long domiciled here make "Pappadams" thin crisp cakes and are neither priests nor beggars. These men speak Malayalam.

PANDITATTAN (1,299).—Tamil goldsmiths¹

PARAVAN (67).—Chunnam manufacturer.

PARAYAN (7,145).—These are the lowest people in the social scale. They are chiefly engaged as agricultural coolies though many among them make articles of bamboo and cadjan umbrellas.

PATHAN (1,165).—These are Musalmans of Afghan descent.

PISHARODI (1,228).—A class of Ambalavasis who are temple servants. Tradition says that they are children of a Sanyasi by a Brahman female whom he took as his wife. Another version says that a Brahman novice who, when about to be ordained a sanyasi, ran away as he did not like to take up that life and the children born to him afterwards were called Pisharodis.

PONDAN (56).—A sub-caste of Idaiyan. They are palanquin bearers of His Highness the Maharaja of Cochin.

PULAYAN (69,423).—These are field labourers who were originally slaves. They are also called Cherumas.

PULUVAN (114).—A set of professional beggars.

PUDUVAL (891).—A division of Ambalavasis.

RAJAPUT (16).—A Kshatriya caste from upper India.

RAVUTTAN (6,544).—Musalman immigrants from the east coast.

REDDI (11).—A cultivating caste of the Telugu country. They are also known as Kappus.

SAIYID (139).—The highest sect of Musalmans.

SAMANTAN (59).—Nayar aristocrats who consider themselves to be superior to the ordinary Nayars in caste. Tradition says that they were originally Kshatriyas and being afraid of Parasurama, the destroyer of Kshatriyas, they renounced their caste observances and migrated to other countries. Subsequently they visited Malabar and requested Cheraman Perumal to restore them their Kshatriya status. Cheraman Perumal then classed these people as Samantas. Some say these are the offsprings of Nayar females with Kshatriya males.

SHABI (1,140).—A Musalman sect.

SHANAN (1).—A Tamil toddy drawing caste.

SHEIK (2,095).—A Musalman tribe.

TAMIL BRAHMAN (21,836).—They are also called Pattars to distinguish them from Nambudiri Brahmans, the Brahmans of Malabar.

TARAKAN (800).—Tamil Sudras who are a trading class. They are found only in the Chittur Taluk. Some of them have begun to take the title of "Menon".

TATTAN (5,602).—Goldsmith. They are a division of Kammalans

THIYYATTUNNI (30).—A division of Ambalavasis who are to perform ceremonies called Tiyyattam in Bhadrakali Temples. They are also called Tiyyattu Nambiyans. Their women are called Pushpanis or Brahmanis.

TOLKOLLAN (349).—Kammalans who work in leather.

TOTTIYAN (58).—A Telugu cultivating caste.

ULLATAN (413).—A hill tribe. They are below Pulayans and Parayans in social scale.

VADUKAN (657).—Baliyas and Kapus are often called by this name in Tamil and Malayalam countries. Strictly speaking it is not the name of a caste.

VAISYAN (886).—One of the four Hindu castes. They are mostly Komattis and Baniyas

VALAN (9,507).—Fishermen and boatmen. Mukkuvans who are a sub-caste of Arayans are the priests of Valans.

VALACHETTI (37).—"Vala" in Malayalam means a bangle, and hence the word means one who sells this article. They belong to the Baliya class.

VALLUVAN (30).—They are the priests of Parayans.

VANIYAN (995).—Konkani Vaisyans. They wear the sacred thread. Their priests are called Panditans.

VANNAN (2,038).—Also called Mannan. They are Tamil washermen.

VARIYAR (2,600).—A division of Ambalavasis. Their women are called Varasyars.

VELAKKATTALAVAN (3,185).—Hereditary barbers to the Nayars and other caste-Hindus. They resemble Nayars in their dress and customs.

VELAN (6,232).—A class of washermen but inferior in social scale to Veluttedans.

VELLALAN (4,587).—A cultivating Tamil caste.

VELUTTEDAN (3,347).—Hereditary washermen to the Nayars and other caste-Hindus. They resemble Nayars in their dress and customs.

VETTUUVAN (4,759).—Agricultural labourers and collectors of forest produce.

VILKURUP (1,005).—Same as Tolkollans; but these were in old days engaged in making bows and arrows. *Vil* means a bow.

VIRASAIVAN (11).—A sect of Hindu reformers.

WHITE JEWS (153).—One of the two divisions of the local Jews; the other division being Black Jew.

CHAPTER XII.

OCCUPATION.

84. This Chapter is an important one, and the tables will show at a glance how people are enabled to exist and support themselves; but the questions as to occupation or means of livelihood are either incorrectly or carelessly answered. Detailed instructions were issued to Supervisors and Enumerators in the matter of filling up columns relating to "Occupation" and the few mistakes which crept into the schedules were corrected, before sorting, in the Tabulation Office. The arrangement in the table is slightly different from the arrangement at the Census of 1911. The actual number of occupations this time is 191 as against 169 in 1911, and the scope of the information has been widened.

85. The Statistics pertaining to this Chapter are embodied in Imperial Tables XVII to XXI, and the Subsidiary Tables given at the end of the Chapter will show the salient features of these statistics.

86. Occupations are divided into four classes and sub-divided into 12 sub-classes as in 1911. These are again divided into 56 orders as against 55 in 1911. These orders are again sub-divided into 191 groups in all, as against 169 in 1911.

87. Taking the four classes of occupations recorded in Imperial Table XVII, it is seen that the class A (production of raw materials) takes in 52·4 per cent. of the total population; and class B (preparation and supply of material substances) 34·5 per cent. Public administration and liberal arts which form class C take in 6 per cent and the balance, viz., 7·1 per cent. is taken by class D (miscellaneous occupations.) The functional distribution shows that 50·2 per cent. or half of the population are agriculturists including dependents and textiles and dress industries are the occupation of 7·1 per cent. Trade in food stuffs supports 7·2 per cent.

88. Females preponderate in comparatively light and less lucrative works and a few such are given in the margin. There are however several occupations from which women are completely shut out. But this is not a peculiarity confined to the State. Women have begun to share the duties and responsibilities of the stronger sex, and ere long it may be confidently expected that females will be found in all walks of life.

89. Agricultural population consists of cultivating and non-cultivating land-lords, cultivating and non-cultivating tenants, agents, or managers &c. of landed estates, farm servants and field labourers and growers of agricultural products. Agriculture is the main stay of the people and out of a total population of 979,080, this profession supports whether as actual workers or dependents, 491,517 persons as against 463,074 in 1911. At the last Census "Agriculture" was held to include orders 1 (a), (b), (d) & (e) whereas in the present Census, it is made to cover only orders 1 (a) & (b). The State is essentially an agricultural country, and the advancement of

Introduction

Reference to statistics.

Strength of each class of occupation.

Occupation of females.

	Males.	Females.
1. Fibres (cocoanut &c.) ...	9,120	15,838
2. Rice pounders, huskers & flour grinders ...	938	9,145
3. Washing, cleaning, &c. ...	2,537	3,282
4. Sweepers, scavengers, &c. ...	214	1,568
5. Midwives, vaccinators, nurses, &c. ...	100	166
6. Beggars, vagrants, &c. ...	591	707

Agricultural population.

industries is more or less bound up with development of agriculture. The increase in the agricultural population during the decade is 6.1 per cent.

90. Out of a total number of 130,052 males and 73,091 females who are agriculturists, 11,676 males and 3,458 females have returned subsidiary occupations. Of these, nearly 2.8 per cent. are cultivating tenants and 1.6 per cent. are field labourers. The figures in the Imperial Table XVIII "Subsidiary occupation of Agriculturists" cannot be regarded as a sure basis for general comment as most of these so called subsidiary occupations are not followed throughout the year and add but very little to the scanty income from agriculture.

91. Industrial occupations come under orders 6—18, groups 25—103. Textiles (order 6) have no entries against 7 of the 14 groups into which this order is divided, while out of 50,636 the total strength of the order, 42,173 come under group 30. The making of coconut fibre and yarn is a paying industry especially for women and children while engaged in household work. While there were 39,510 persons engaged in this industry in 1911, their number has now increased to 42,173. The dependents under this group has also increased from 15,072 to 17,215. Cotton sizing and weaving, chiefly as a cottage industry, has a strength of 7,287 as against 6,626 in 1911. All these industries, under textiles, together support 5.2 per cent. of the total population.

Out of a total strength of 43,524 under food industries (order 12) 16,920 are rice pounders and huskers and flour grinders, while 24,653 are toddy drawers. Under ceramics (order 10) potters and earth pipe makers number 3,302. Order 13, "washing, cleaning and dyeing" supports 9,026 or 47.2 per cent. of the total strength of the order.

92. This sub-class is divided into five orders according as the transport is by air, water, road, rail or postal, telegraph and telephone services. Transport by air has no entries against it and is likely to remain so for years to come. Of the other four means of transport, that by road (order 21) supports 10,971 while that by water maintains 6,901. Transport by rail (order 22) employs 2,189. These are all railway employees or labourers employed on railway construction and maintenance, &c. On account of extensive waterways and good metalled roads, the State affords ample facilities for transport by water and road. The development of the Cochin Harbour, when it becomes an accomplished fact, will considerably increase the number supported by "transport by water and road". Post Office, Anchal Office, Telegraph and Telephone services come under "transport" order 23. These maintain 1,068 persons including dependents.

93. On account of its geographical conditions, the State enjoys considerable facilities for trade and commerce. The facilities will be better utilised with the development of the Cochin Harbour

Trade	1921.	1911.
1. Banks, establishments of credit, &c.	4,931	4,424
2. Trade in textiles	6,058	5,646
3. Trade in wood	1,307	1,305
4. Trade in pottery	389	217
5. Trade in chemical products	851	942
6. Hotels, cafes, restaurants, &c.	10,336	9,690
7. Other trade in food stuffs	54,865	59,573
8. Trade in building materials	1,753	1,585
9. Trade in fuel	2,130	2,043
10. Trade in articles of luxury & those pertaining to letters, arts & sciences.	1,961	1,118

which has been taken in hand. The commercial population of the State, including those engaged in transport forms 13 per cent. of the total population as against 13.6 per cent. in 1911. Some of the chief articles of trade are given in the margin together with the number of persons supported by their sale in 1921 and 1911.

94. The avocations included in this class consists of those engaged in public administration, religion, law, medicine, instruction and letters, arts and sciences. Persons who get their means of subsistence, by following these avocations are few. Public administration & liberal arts. All told, their total strength comes to 58,448 or 6 per cent. of the total population. Public administration including army and police has a total strength of 13,504. Religion maintains 9,252; while law, medicine, instruction and letters, arts and sciences together maintain 35,692 as against 19,916 in 1911, thereby giving an increase of 79.2 per cent. The strongest of the order is "instruction" which supports 20,067 as against 7,417 in 1911. This large increase is only to be expected where literacy is so very widely prevalent.

95. This class (D) includes persons living principally on their income, domestic service, general terms which do not indicate a definite occupation, inmates of jails, asylums, and alms houses, beggars, vagrants and prostitutes and other unclassified non-productive industries. Miscellaneous. The strength of this class as a whole aggregate 70,141, as against 75,443 in 1911. A portion of this large reduction is under "beggars, vagrants, etc.," which is a sign of the State's prosperity and her advancement in civilisation. Of these, 34,948 or nearly half are dependents. Among "labourers and workmen otherwise unspecified" the dependents exceed the actual workers.

96. Imperial Table XIX has not been prepared as there are few cases of mixed occupations in the State.

97. Imperial Table XX shows distribution by religion of workers and dependents in different occupations while Imperial Table XXI gives the occupation of certain selected castes. Occupation by religion and caste. The Hindus form about 66 per cent. of the total population and this increase influences the numerical strength under various occupations; but in respect of chemical products, furniture, transport by water, brokerage, commission and export, trade in textiles and in a few other occupations, the Christians preponderate.

Imperial Table XXI gives information in regard to 45 selected castes and it is interesting to note the marked extent to which traditional occupations are being deviated from. All castes, whatever their traditional occupations may be, scramble for land. Among Brahmans who are to minister to the spiritual needs of the people, only 858 or 94 in one thousand are returned as following their traditional calling. The remaining have taken up agriculture (268), trade in food stuffs (129), public administration (99), law (28), and medicine (10). Nayars who are military and agricultural are mainly cultivating tenants and field labourers. In one thousand 36 are engaged in building industries, 24 in public administration, 7 in law, 6 in medicine, and 23 in domestic service. Indian Christians who are not hampered by religious prejudices are found in almost all walks of life. Of the agricultural population 23.6 per cent. are Christians, while in one thousand actual workers of this community, four are engaged in public administration, ten in instruction and four in medicine. Among Iluvans whose traditional occupation is toddy drawing, 487 in one thousand actual workers follow agriculture, 42 in building industries, two in public administration, one in law, five in medicine and seven in domestic service. Arayans, Chakkans, Kanakkans, Kusavans, Velakkatalavans and Veluttedans appear to have very little departed from their traditional occupations. Coming to industries, Kammalans form 52.6 per cent of those who work in hides. Of those who work in textiles, Christians form 45 per cent. and Iluvans 25 per cent. Among workers in

wood 29·7 per cent. are Kammalans, 20·4 per cent. Iluvans, 4·7 per cent. Nayars, 11·5 per cent. Parayans and 12·7 per cent. Indian Christians.

98. Group 190 “procurers and prostitutes” is blank. The occupation is, no doubt, a degrading one and the worst of procurers and prostitutes are not likely to admit this occupation as their means of livelihood. It is probably due to this reason that a few prostitutes who can be found in the State have not returned their occupation as such.

99. Notwithstanding deviations from traditional or hereditary occupations the members of such occupations still preponderate them to a certain extent.

100 Imperial Table XXII, parts I to VII and Subsidiary Tables I to VIII at the end of the Chapter embody the result of Industrial Survey conducted along with the Census of the population. There are 109 Industrial concerns in which at least 10 persons are employed. Out of 8,322 hands employed, 6,711 are males and the rest females. Of these, 1,592 males and 96 females are skilled labourers. Among the latter, 11 are either Europeans or Anglo-Indians and the rest Indians. Out of the total number of hands employed, 438 are engaged in supervision and 296 in clerical work; the rest are ordinary labourers. Distributed by age 7,669 are above 14 years of age and 653 are below that age. Of the latter 252 are girls and the rest boys. 38 industrial concerns are managed either by Europeans or Anglo-Indians, 27 by Hindus, 32 by Christians, 10 by Musalmans and 2 by others. Mechanical power is used in 44.

TABLE IV.

**TOWNS CLASSIFIED BY POPULATION WITH VARIATION
SINCE 1875.**

Urban population was separately censused for the first time in 1891. The figures given in columns 8 and 9 are only approximate.

Cranganur was for the first time treated as a town in 1913, and the two towns Chittur and Tattamangalam were united into one Municipal Town in 1914.

TABLE IV.
Towns classified by Population with variation since 1875.

TABLE XIV.

CIVIL CONDITION BY AGE FOR SELECTED CASTES.

NOTE:—This Table like Table IX deals only with certain selected castes and not with the whole population. All main castes over 2,000 in strength and a few others, which though not numerically so strong, are of local importance, are included in this Table.

TABLE XXII.

INDUSTRIAL STATISTICS.

- Part I.—Provincial Summary.**
- Part II.—Distribution by Districts.**
- Part III.—Industrial Establishments classified according to the class of Owners and Managers.**
- Part IV.—Caste or Race and Birth place of Skilled workmen classified according to their Industry and Occupation.**
- Part V.—Caste or Race and Birth place of Unskilled Labourers classified according to the Industry in which they are working.**
- Part VI.—Details of power employed—**
 (1) For Establishments using Steam, Oil, Gas, Water, etc.
 (2) For Establishments using Electric power generated on the premises.
 (3) For Electric power supplied from outside.
- Part VII.—Number of Looms in use in Textile Establishments.**
-

NOTE.—1. Part VI (2) and (3) have not been prepared as there are no industrial establishments using electric power.

2. Subsidiary statements showing details of women employed as Managers etc have been appended to Part I and II.
